SUMMARY

- Dynamic IT professional with 4+ years of experience specializing in data integration within Azure environments.
- Extensive expertise in designing and developing Extract, Transform, Load (ETL) processes across diverse data sources.
- Proficient in metadata management, building and optimizing data pipelines, and performing complex data transformations to ensure seamless integration from source to target databases.
- Adept at collaborating with cross-functional teams, gathering requirements, and driving the development lifecycle of ETL solutions.
- Skilled in problem-solving and implementing innovative solutions, with a commitment to continuous improvement and excellence in data integration practices.
- Proven track record in delivering high-quality, scalable solutions and driving business value through efficient data integration strategies.
- Open to relocation and actively seeking opportunities in the UAE and GCC region.

SKILLS

Data Quality:	Ataccama ONE, Data Quality Management, Metadata Management, Master Data Management.
Data Pipeline:	Azure Data Factory, Microsoft Fabric, Azure Event Grid, Azure Logic Apps.
Data Processing:	Databricks, Apache Spark, PySpark, Python.
Database Management:	Azure SQL Database, Oracle Database, Data Warehousing.
Automation & Scripting:	Python, Shell Scripting, Stored Procedures.
Storage:	Azure Data Lake Storage Gen2 (ADLS), Azure Blob Storage, Delta Lake, One Lake.
Project Management:	Jira, Azure DevOps.
Development Tools:	Github, Visual Studio Code.

EXPERIENCE

Speridian Technologies — Systems Analyst 07/2025 - Current

Clients: City of South San Francisco, City of Long Beach

- POC: Integrated Microsoft Fabric Pipelines with Azure Event Grid using Logic Apps to enable event-based orchestration by configuring Event types to perform custom actions.
- Collaborated with cross-functional teams to gather requirements, map ETL processes, validate data, and facilitate deployment.
- Built dynamic data pipelines for extracting and transforming data from multiple sources (Flat files, SQL Server, OracleDB).
- Designed Azure SQL Database structure with both configuration and data tables to support dynamic and scalable data loading.
- Developed Stored Procedures for complex data transformation in staging and transformation layer to follow standard medallion architecture.
- Loaded validated municipal data into Salesforce, maintaining compliance with business rules and ensuring data quality and integrity.
- Configured custom fields on Salesforce objects and adjusted page layouts to enhance visibility of related data fields.
- Developed Python-based scripts to migrate and load municipal document attachments and Laserfiche records into salesforce, improving accessibility and streamlining document management.

Client: HPI

- Collaborated closely with scrum master for Jira story assignments, worked on tasks within designated sprints.
- Worked closely with stakeholders to gather ETL requirements and design detailed ETL mapping documents for efficient data transformation.
- Developed and optimized SQL scripts for data extraction, transformation, and loading (ETL), handling complex joins and filters across multiple tables.
- Built and automated data pipelines using Azure Data Factory, ensuring efficient data integration and processing.
- Created and managed job clusters in Azure Databricks to execute ETL frameworks, optimizing performance and resource usage.
- Debugged ETL processes using error logs and resolved data quality issues.
- Worked with Ataccama ONE to design and implement Data Quality Rules, MDM solutions and Data Catalog for metadata management and data governance initiatives.
- Coordinated with DevOps team for production deployment of ETL processes, handling SQL scripts through GitHub Pull Requests.
- Ensured high data accuracy by executing unit tests and performing data validation throughout the ETL process.
- Executed unit test cases (UTC) as part of ETL process, ensuring data accuracy.

Wipro Limited — ETL Application Developer

04/2022 - 12/2022

Client: HPI

- Developed Databricks jobs to execute ETL tasks, ensuring efficient processing and delivery of critical data.
- Developed and enhanced data pipelines for seamless data integration and transformation.
- Utilized SSMS (SQL) for data validation and transformation, ensuring data consistency and accuracy in ETL processes.
- Applied performance optimization techniques to improve the speed and efficiency of ETL pipelines.
- Automated data loading processes using shell scripting, improving workflow efficiency and reducing manual intervention.
- Collaborated with development teams and stakeholders to align data solutions with project objectives and business requirements.
- Maintained reliability and performance of data infrastructure to support ongoing business needs.

EDUCATION

PES Institute of Technology And Management | Shivamogga, Karnataka

08/2017 - 08/2021

Bachelor of Engineering

CERTIFICATIONS

- AZ-900 Microsoft Azure Fundamentals
- DP-900 Microsoft Azure Data Fundamentals
- Accredited Databricks Fundamentals
- Databricks Accredited Generative AI Fundamentals
- Databricks Data Engineer Associate (Training completed)
- DP-700 Microsoft Fabric (Training completed)
- Power BI Level 1 & Level 2
- GitHub Copilot

PERSONAL INFORMATION

Nationality:	Indian	Date of Birth:	18/02/1998
Languages:	English, Hindi, Kannada	Marital Status:	Single
